# ROBOSAPIEN SECRET #11:
AUTOMATIC ROBOT SENTRY

In "Listen" mode, your Robosapien will wait for over 2 hours before getting bored and shutting down.   You can "link in" the listen modes up to 14 times using the regular **P** program,; the following is an example of how to make your robot "guard" a hallway for hours and always stay in place.

Press S>
Select – Select – LeftTurn (Strike3 on the right controller side)
Select – Listen
Select – Select – Stop (Roar)
Select – Listen
Select – Select – RightTurn (Strike3 on the left controller side)
Select – Backwards

STOP

Press P
Press S> 14 times or until the robot says "Ooo! Uh-Huh!"

Robosapien will now enter a mode where he will wait against a wall and strike anything that passes by, occasionally stepping back into place against the wall. He will do this 42 times before finally stopping. Press **STOP** to deactivate. Press **P>** to play again.

Change the **S>** reflex to the following for more *in-your-face* action.

Press S>
Select – Select – Stop (Roar)
Select – Forwards
Select – Forwards
Select – Select – LeftTurn (Strike3 on the right controller side)
Select – Select – RightTurn (Strike3 on the left controller side)
Backwards

STOP

P>

Robosapien will now awaken, come forward and attack, then return to his place at the wall.

Many such programs are possible.

Have fun!
